1. Reporting entity

Alaris Equity Partners Income Trust is an entity domiciled in Calgary, Alberta, Canada. The unaudited condensed consolidated interim financial statements as at and for the three and nine months ended September 30, 2026, are composed of Alaris Equity Partners Income Trust and its consolidated subsidiary, Alaris Equity Services Corp. ("Service Co") (together referred to as the "Trust"). Alaris Equity Partners Income Trust and Service Co are both domiciled in Canada.

Throughout the notes to the unaudited condensed consolidated interim financial statements, investments and investing activity of Alaris' capital primarily relate to its preferred equity, common equity, and special purpose vehicle ("SPV") strategies. These Partner investments are held directly or indirectly through wholly-owned subsidiaries of the Trust, which are referred to as Acquisition Entities. While there are a number of Acquisition Entities, substantially all of these companies consist of direct or indirect subsidiaries of Alaris Equity Partners Inc. ("AEP", formerly known as Alaris Royalty Corp.), Alaris Equity Partners USA Inc. ("Alaris USA") or Salaris USA Royalty Inc. ("Salaris"). These three companies, which are the significant Acquisition Entities, are the Acquisition Entities for substantially all of Alaris' investments. AEP is a Canadian corporation, Alaris USA and Salaris are both Delaware corporations.

Throughout these statements, the term "Alaris" encompasses Alaris Equity Partners Income Trust and all of its wholly-owned subsidiaries.

2. Basis of preparation and material accounting policies

(a) Statement of compliance:

These unaudited condensed consolidated interim financial statements have been prepared in accordance with International Accounting Standard 34 and do not include all of the disclosures required for full annual financial statements and should be read in conjunction with the audited annual consolidated financial statements for the year ended December 31, 2025.

These consolidated financial statements were approved by the Board of Trustees on November 3, 2026.

(b) Basis of preparation and consolidation:

The Trust meets the definition of an investment entity, as defined by IFRS 10, Consolidated Financial Statements ("IFRS 10"). The Trust has also performed an assessment to determine which of its subsidiaries are investment entities, as defined under IFRS 10. When performing this assessment, the Trust considered the subsidiaries' current business purpose along with the business purpose of the subsidiaries' direct or indirect investments.

Consolidated subsidiary

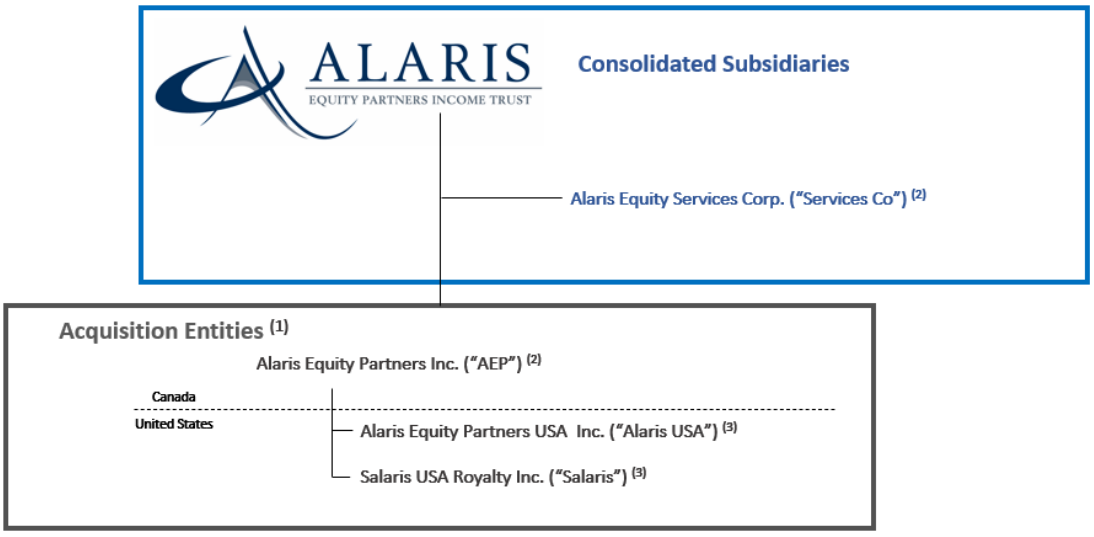

In accordance with IFRS 10, consolidated subsidiaries of an investment entity are those entities that provide investment-related services and that the Trust controls by having the power to govern the financial and operating policies of the entity, and do not themselves meet the definition of investment entities. Such entities would include those who charge management and advisory fees as a result of the Trust's day-to-day operations.

The Trust's wholly-owned and controlled subsidiary, Service Co, provides investment-related services and does not, itself, meet the definition of an investment entity and is therefore consolidated. All intercompany amounts and transactions between the Trust and this consolidated entity have been eliminated upon consolidation.

Interest in unconsolidated subsidiaries

In accordance with the requirements for investment entities under IFRS 10, interests in subsidiaries, other than those that provide investment-related services and do not themselves qualify as investment entities, are accounted for at fair value through profit (loss) ("FVTPL"). These entities are used by the Trust as Acquisition Entities and hold, either directly or indirectly, the Trusts' Partner investments. As denoted below, the Acquisition Entities are recorded as Corporate Investments. The Trust's wholly-owned and controlled subsidiary, AEP, qualifies as an investment entity and is therefore measured at FVTPL.

The following diagram illustrates the Trust's corporate structure, including the significant entities controlled by the Trust, either directly or indirectly, including the Acquisition Entities of the Trust:

(1) The Trust's investments in the Acquisition Entities are recorded as Corporate Investments at fair value through profit (loss)
(2) Principal place of business, Canada; 100% portion of ownership and voting rights
(3) Principal place of business United States; 100% portion of ownership and voting rights

The Trust's interests in the unconsolidated subsidiaries include loans receivable from the Acquisition Entities which are also measured at FVTPL and recognized as Corporate Investments.

The unaudited condensed consolidated interim financial statements have been prepared on the historical cost basis except for the following material items in the statement of financial position:

- Corporate Investments, which include the Acquisition Entities and loans receivable from Acquisition Entities are measured at fair value in the statement of financial position with changes in fair value recorded in earnings (see Note 3).
- The units granted as part of the Restricted Trust Unit plan (RTU) are considered to be grants of financial liabilities and are measured at fair value with changes in fair value recorded in unit-based compensation expense included in earnings and unit-based compensation (see Note 5).
- As the Convertible debenture is a hybrid instrument, the conversion component is measured at fair value (see Note 7).

(c) Functional and presentation currency:

These unaudited condensed consolidated interim financial statements are presented in Canadian dollars, which is the Trust and Service Co's functional currency.

(d) Critical accounting estimates and judgements:

The preparation of the unaudited condensed consolidated interim financial statements requires management to make judgments, estimates, and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income, and expenses. Actual results may differ from these estimates.

Information about assumptions, judgments, and estimation uncertainties that have a significant risk of resulting in a material adjustment within the next twelve months are as follows:

Key estimates used in measuring fair value of Corporate Investments

The fair value of Corporate Investments is measured using an adjusted net asset method. The measurement of the fair value of the Corporate Investments is determined by measuring the fair values of the net assets of the Acquisition Entities, which include the underlying Partner investments held directly and indirectly within them. The fair value is assessed at each reporting date with changes in fair value recognized in net earnings.

An important component of the fair value within the Acquisition Entities is the valuation of the underlying Partner investments, held directly or indirectly, which requires significant management judgement due to the absence of quoted market values, inherent lack of liquidity, and long-term nature of such investments. Partner investments are measured using a discounted cash flow model or capitalized cash flow. Significant assumptions used in the valuation of the preferred unit investments include the discount rate, timing of exit and changes in future distributions. Significant assumptions used in the valuation of the common equity investments include the discount rate, terminal value growth rate, cash flow multiple, and estimated future cash flows. Significant assumptions used in the valuation of the convertible preferred unit investments include the discount rate, estimated future cash flows, and cash flow multiple. See Note 3 for related disclosure on assumptions used in fair value assessments.

Management's estimates and judgements are influenced by current macroeconomic and geopolitical conditions. These factors may impact the assumptions used in areas such as the valuation of the underlying Partner investments, and the estimation of future cash flows, particularly where operations or counterparties are exposed to geopolitical uncertainty.

Material accounting policies:

The disclosures contained in these unaudited condensed consolidated interim financial statements do not include all the requirements of IFRS Accounting Standards for annual financial statements. The unaudited condensed consolidated interim financial statements should be read in conjunction with the audited annual consolidated financial statements for the year ended December 31, 2025. The unaudited condensed consolidated interim financial statements are based on accounting policies, as described in Note 2 to the 2025 audited annual consolidated financial statements.

In May 2024, the International Accounting Standards Board ("IASB") issued Amendments to the Classification and Measurement of Financial Instruments – Amendments to IFRS 9 and IFRS 7. The amendments updated the classification and measurement requirements in IFRS 9 and the related disclosures in IFRS 7, amending the requirements related to settling financial liabilities and clarifying how to assess contractual cash flow characteristics, including environmental, social, and governance ("ESG") impacts related to financial assets. The amendments are effective for the periods beginning on or after January 1, 2026, and the adoption of these amendments did not have an effect on the unaudited condensed consolidated interim financial statements.

In April 2024, the IASB issued IFRS 18, *Presentation and Disclosure in Financial Statements*, which replaces IAS 1, *Presentation of Financial Statements*. IFRS 18 introduces new requirements for the presentation of financial performance in the statement of profit or loss, including specified categories and subtotals, enhanced disclosures regarding management-defined performance measures, and new principles for the aggregation and disaggregation of information presented in the financial statements. IFRS 18 is effective for annual reporting periods beginning on or after January 1, 2027. The Trust is currently evaluating the impact of adopting IFRS 18, including the effect on the presentation of the statement of profit or loss and related disclosures. Based on the assessment completed to date, the Trust expects the standard to primarily affect the presentation and disclosure of information within the financial statements. The assessment remains ongoing, and the full impact of adoption has not yet been determined.

3. Corporate Investments

The Trust's Corporate Investments are recorded at FVTPL in accordance with IFRS 9 and IFRS 10, as described in Note 2. AEP directly or indirectly invests the Trust's capital. The Trust's Corporate Investments include the fair value of the net assets of its Acquisition Entities that are controlled by the Trust, both directly and indirectly. Accordingly, the Trust's direct Corporate Investments comprise these Acquisition Entities, which invest in our Partners.

The following table details the fair value of the Trust's material directly and indirectly held Acquisition Entities, which are controlled by the Trust, but which are not part of the consolidated subsidiaries:

Corporate Investments *$ thousands*	**30-Sep 2026**	**31-Dec 2025**
Acquisition Entities		
Partner investments	$ 2,170,321	$ 1,927,396
Net assets (liabilities)	$ (909,101)	$ (729,501)
Total Acquisition Entities	**$ 1,261,220**	**$ 1,197,895**
Intercompany loans		
Intercompany loans receivable from Acquisition Entities	$ 294,422	$ 207,872
Total Corporate Investments	**$ 1,555,642**	**$ 1,405,767**

The following table details the fair value of the net assets (liabilities) of Acquisition Entities excluding the Partner investments held by these Acquisition Entities:

Acquisition Entities net assets (liabilities) *$ thousands*	**30-Sep 2026**	**31-Dec 2025**
Assets		
Cash	$ 11,822	$ 5,131
Accounts receivable and prepayments	4,799	-
Income taxes receivable	6,085	17,407
Other long-term assets	28,787	29,365
Derivative contracts	4,612	860
Liabilities		
Accounts payable and accrued liabilities	(4,564)	(4,133)
Income taxes payable	(1,317)	-
Deferred income taxes	(157,265)	(145,333)
Derivative contracts	(962)	(154)
Senior credit facility	(506,676)	(424,772)
Intercompany loans payable	(294,422)	(207,872)
Total	**$ (909,101)**	**$ (729,501)**

The Trust has advanced intercompany loans to the Acquisition Entities totaling $294.4 million (December 31, 2025 - $207.9 million). The corresponding intercompany loans payable to the Trust, which total $294.4 million (December 31, 2025 - $207.9 million) form part of the Trust's Corporate Investments, which are recorded at FVTPL. There is no impact on net assets or net earnings from these intercompany loans.

The following table lists the fair value of the Trust's underlying Partner investments at September 30, 2026 and December 31, 2025. These investments are held both directly and indirectly by AEP, the Trust's directly-held unconsolidated subsidiary.

As noted in critical accounting estimates above, the measurement of the fair value of the Corporate Investments is significantly impacted by the fair values of the Partner investments held directly and indirectly through AEP. Partner investments listed below are denominated in their respective local currencies, except for the following: LMS Management LP and LMS Reinforcing Steel USA LP (collectively, "LMS"), which include a portion of their total investment denominated in USD and translated into Canadian dollars using period-end exchange rates; and Professional Electric Contractors of Connecticut, Inc. ("PEC"), which includes a portion of its total investment denominated in Canadian dollars and translated into USD using the period-end exchange rate. The

total United States investments denominated in USD are also translated below into Canadian dollars using period-end exchange rates.

The change in fair value of the Trust's Corporate Investments, which include intercompany loans, for the nine months ended September 30, 2026 is as follows:

Corporate Investments *$ thousands*	**Carrying Value January 1, 2026**	**Invested Capital**	**Redemptions / Repayments**	**Foreign Exchange Adjustment**	**Fair Value Adjustment**	**Carrying Value September 30, 2026**

Gain / (loss) on Corporate Investments

Net gain / (loss) on Corporate Investments for the three and nine months ended September 30, 2026 and 2025 is composed of the following and is representative of the changes in net assets (liabilities) within the Acquisition Entities as well as the changes in fair value of the Partner investments:

Net gain / (loss) on Corporate Investments	Three months ended September 30		Nine months ended September 30	
$ thousands	2026	2025	2026	2025
Partner distribution revenue - preferred	$ 49,858	$ 40,664	$ 143,575	$ 120,792
Partner distribution revenue - common	22,386	16,707	26,475	21,322
Net realized gain on Partner investments [Note 1]	-	-	6,911	1,099
Net unrealized gain / (loss) on Partner investments	(58,853)	47,917	(45,352)	63,458
Fair value loss on promissory notes	-	-	-	(1,146)
Operating costs and other	(1,054)	(1,361)	(3,462)	(2,876)
Transactions costs	(1,758)	(2,495)	(4,566)	(6,512)
Finance costs and senior credit facility	(8,846)	(7,724)	(23,434)	(22,032)
Acquisition Entities income tax expense - current [Note 2]	(7,132)	(4,802)	(13,601)	(14,652)
Acquisition Entities income tax recovery / (expense) - deferred	6,077	(13,719)	(6,694)	(16,188)
Management and advisory fees paid to Trust	(5,939)	(4,956)	(17,321)	(14,351)
Interest on intercompany loans	(6,402)	(3,104)	(18,119)	(9,348)
Net unrealized gain / (loss) on derivative contracts	2,285	(926)	2,935	911
Realized gain / (loss) on foreign exchange contracts	(245)	76	(693)	(446)
Net gain earned from Acquisition Entities operations	**$ (9,623)**	**$ 66,277**	**$ 46,654**	**$ 120,031**
Acquisition Entities dividends paid to Trust	(12,572)	(11,545)	(36,942)	(33,119)
Net gain / (loss) on Corporate Investments	**$ (22,195)**	**$ 54,732**	**$ 9,712**	**$ 86,912**

Note 1 – For the nine months ended September 30, 2026 included in Net realized gain on Partner investments is US$1.1 million related to a portion of the legacy Ohana investment redeemed and the partial redemption of partner 3E for US$3.8 million, for a total Net realized gain on Partner investments of US$4.9 million (CAD$6.9 million).

Note 2 – The amount of cash taxes paid by the Acquisition Entities in the three months ended September 30, 2026, was $0.4 million (three months ended September 30, 2025: payment of $3.2 million). For the nine months ended September 30, 2026, cash taxes net to a payment of $0.4 million (nine months ended September 30, 2025: payment of $8.4 million).

Below is a summary of the fair value of the Acquisition Entities' Partner investments by common and preferred unit investments, presented in local currency and Canadian dollars, translated at the period end spot rate at September 30, 2026 and December 31, 2025:

Partner Investments Carrying Value	September 30, 2026		December 31, 2025	
$ thousands	Acquisition Cost	Carrying Value	Acquisition Cost	Carrying Value
Total Preferred / Debt (based in US) - USD	$ 987,714	$ 973,109	$ 903,563	$ 924,696
Total Common (based in US) - USD	$ 228,649	$ 306,329	$ 203,654	$ 279,934
Total (based in US) - USD	$ 1,216,363	$ 1,279,438	$ 1,107,217	$ 1,204,630

Total Common (based in Canada) - CAD	$ 63,322	$ 86,122	$ 50,522	$ 63,322
Total (based in Canada) - CAD	$ 356,822	$ 354,927	$ 283,522	$ 278,018
Total Preferred / Debt - CAD	**$ 1,694,967**	**$ 1,649,549**	**$ 1,470,158**	**$ 1,480,788**
Total Common - CAD	**$ 387,752**	**$ 520,772**	**$ 329,365**	**$ 446,608**
Total - CAD	**$ 2,082,719**	**$ 2,170,321**	**$ 1,799,523**	**$ 1,927,396**

Assumptions used in fair value of the net assets of the Acquisition Entities, exclusive of Partner investments:

Other than the fair value of other long-term assets, the fair value of the assets and liabilities are equal to their carrying values, due to the nature and timing of expected settlement. In determining the fair value of the net assets of the Acquisition Entities, Alaris considers any contingent liabilities, commitments and other obligations as they arise. The carrying values of the assets and liabilities are determined in accordance with IFRS Accounting Standards.

Other long-term assets are primarily made up of promissory notes issued to Partners and deposits with the CRA which have been paid in order to defend the reassessment. The fair value of other long-term assets includes assumptions related to the

ongoing CRA reassessment within the Acquisition Entities and the collectability of promissory notes issued, reflecting the fair value at period end.

With respect to the deposits with the CRA, should the Acquisition Entities be unsuccessful in defending the reassessment, these deposits will not be recoverable. The Acquisition Entities have obtained insurance to mitigate the risk related to this reassessment. In determining the fair value of the deposits paid and the promissory notes receivable, the Trust considered the timing of collection and proceeds thereon, and when appropriate, the probability weighted outcome. Key assumptions included in this assessment include the discount rate, and when appropriate, the probability assigned to each scenario. Alaris assigns a probability weighting to two economic scenarios which are representative of Alaris' best estimate of the likelihood of the probable scenarios underlying the investment valuation.

Assumptions used in fair value of underlying Partner investments:

Alaris estimates the fair value of its preferred unit investments using discounted cash flows of future distributions and redemptions. Alaris estimates the fair value of its convertible preferred unit investments using discounted cash flows of the future distributions and the enterprise value. Alaris estimates the fair value of the common equity investments using discounted cash flows or capitalized cash flows of the underlying business. Key assumptions used in the valuation of the preferred unit investments include the discount rate, terminal value growth rate, timing of exit, and estimates relating to changes in future distributions. Key assumptions used in the valuation of the convertible preferred unit investments include the discount rate, estimated future cash flows, and cash flow multiple. Key assumptions used in the valuation of the common equity investments include the discount rate, terminal value growth rate, cash flow multiple and estimated future cash flows. Information about recent transactions carried out in the market as well as other considerations with respect to relevant market transactions may be used for the purposes of the valuation of common equity investments.

For each individual Partner, Alaris considered a number of different discount rates and cash flow multiple factors including company-specific items such as; what industry they operate in, the size of the entity, the health of the balance sheet and the ability of the historical earnings to cover the future distributions, the lack of liquidity inherent in a non-public investment and the fact that comparable public companies are not identical to the companies being valued. Such considerations are necessary because, in the absence of a committed buyer and completion of due diligence procedures, there may be company specific items that are not fully known that may affect the fair value. A variety of additional factors are reviewed, including, but not limited to, financing and sales transactions with third parties, current operating performance and future expectations of the particular investment, changes in market outlook and the third-party financing environment. In determining changes to the fair value of the underlying Partner, emphasis is placed on current company performance and market conditions. Cash flows have been discounted at rates ranging from 11.6% - 25.8%.

These assumptions are refined each reporting period as new information is obtained and may continue to require future adjustment to the fair value of the investments. All assumptions made at September 30, 2026 are based on the information available to the Trust as of the date of these financial statements. Refer to Note 9 for additional information, including sensitivity analyses of these inputs.

4. Unitholders' capital

The Trust is authorized to issue an unlimited number of trust units. At September 30, 2026, the number of units issued and outstanding was 50,776,245 (December 31, 2025 – 45,338,811).

In September 2026, the Trust completed a bought deal short-form prospectus offering of 5,134,750 trust units at a price of $22.40 per unit, for aggregate gross proceeds of $115.0 million, which includes the exercise in full of the over-allotment option to purchase 669,750 units for gross proceeds of $15.0 million. After deduction of the underwriters' fees and expenses of the offering, net proceeds to the Trust were $110.0 million.

Outlined below are the weighted average units outstanding for the three and nine months ended September 30, 2026 and 2025:

Weighted Average Units Outstanding	**Three months ended September 30**		**Nine months ended September 30**	
thousands	**2026**	**2025 (1)**	**2026**	**2025 (1)**
Weighted average units outstanding, basic	45,809	45,366	45,583	45,470
Effect of outstanding RTUs	-	636	652	636
Effect of outstanding Senior debenture	-	3,589	2,945	3,589
Effect of outstanding Convertible debentures	-	3,702	-	1,633
Weighted average units outstanding, fully diluted	45,809	53,293	49,180	51,328

(1) Comparative diluted earnings per unit amounts have been revised to reflect the inclusion of the Senior debentures as potential ordinary units, when dilutive, and to reflect certain additional adjustments associated with the Convertible debentures, including changes in the fair value of the conversion feature.

For the three months ended September 30, 2026, the outstanding RTUs, Senior debentures, and Convertible debentures were anti-dilutive. For the nine months ended September 30, 2026, the outstanding Convertible debentures were anti-dilutive. Accordingly, these instruments were excluded from the calculation of diluted earnings (loss) per unit.

Outlined below are the adjusted earnings (loss) and comprehensive income (loss) for the three and nine months ended September 30, 2026 and 2025.

Earnings / (loss) and comprehensive income / (loss)	**Three months ended September 30**		**Nine months ended September 30**

Accretion Convertible debentures	-	351	-	457
Conversion revaluation on Convertible Debentures	-	(1,220)	-	(1,316)
Adjusted earnings / (loss) and comprehensive income / (loss)	($6,192)	$ 87,811	$ 79,597	$ 95,640
Weighted average units outstanding - diluted	45,809	53,293	49,180	51,328
Diluted earnings / (loss) per unit	**($0.14)**	**$ 1.65**	**$ 1.62**	**$ 1.86**

(1) Comparative diluted earnings per unit amounts have been revised to reflect the inclusion of the Senior debentures as potential ordinary units, when dilutive, and to reflect certain additional adjustments associated with the Convertible debentures, including changes in the fair value of the conversion feature.

Distributions

For the three months ended September 30, 2026, the Trust declared a quarterly distribution of $0.39 per unit, paid on October 15, 2026, totaling $19.8 million (2025 - $0.34 per unit and $15.4 million). The total distributions declared during the nine months ended September 30, 2026, were $1.14 per unit and $53.9 million in aggregate (2025 - $1.02 per unit and $46.4 million in aggregate).

5. Unit-based payments

The unit-based compensation expense relating to the RTU plan is based on the unit price of the Trust's units at September 30, 2026, and based on the remaining time left until vesting for each tranche of units. At September 30, 2026, the Trust's unit price was $23.21 per unit and the total liability related to the RTU's is $7.8 million (December 31, 2025 - $8.2 million).

On March 9, 2026, the Board of Trustees approved a Total Return Participation plan (the "TRP") applicable to certain members of management. The TRP provides for participation in common equity returns in excess of a 10% hurdle, subject to a two-year holdback period and Board approval.

The initial payout pool relates to the 2023 performance period, which was settled in May 2026. The total additional compensation recognized with this pool is $3.1 million (2025 - nil). As the TRP was approved subsequent to year-end, compensation expense was recognized in the first quarter of 2026.

Compensation expense related to the 2024 and 2025 performance periods will be recognized when the applicable performance conditions are satisfied, which is expected to occur upon completion of the respective two-year holdback periods and upon Board approval.

6. Senior unsecured debentures

During the year ended December 31, 2022, the Trust issued $65.0 million aggregate principal amount of senior unsecured debentures ("Senior debentures") at a price of $1,000 per Senior debenture and an interest rate of 6.25% per annum, payable semi-annually on the last business day of March and September which commenced March 31, 2022 with a maturity date of March 31, 2027.

On and after March 31, 2026 and prior to the maturity date, the Senior debentures will be redeemable, in whole or in part, at the Trust's option at par plus accrued and unpaid interest, if any, up to but excluding the date set for redemption. The Trust has the option to satisfy its obligations to repay the principal amount of, and premium (if any), on the Senior debentures due at redemption or on maturity by issuing and delivering the appropriate number of freely tradeable trust units of the Trust to Senior debenture holders.

Senior Unsecured Debenture *$ thousands*		**Total**
Balance at January 1, 2026	$	64,223
Accretion expense		458
Balance at September 30, 2026	**$**	**64,681**

The Trust recorded $2.8 million in issuance costs which are amortized using the effective interest rate method over the five-year term of the Senior debentures.

7. Convertible debentures

In June 2025, the Trust issued convertible unsecured senior debentures ("Convertible debentures") that bear interest at 6.50% per annum, payable semi-annually on the last business day of June and December with a maturity date of June 30, 2030.

The Convertible debentures are convertible at the holder's option at any time prior to the close of business on the earlier of the business day immediately preceding the maturity date of June 30, 2030 and the date specified by the Trust for redemption of the Convertible debentures into fully paid and non-assessable units of the Trust, at a conversion price of $24.85 per unit, being a conversion rate of approximately 40.2414 units for each $1,000.00 principal amount of the Convertible debentures.

The Convertible debentures are not redeemable by the Trust before June 30, 2028. On and after June 30, 2028 and prior to June 30, 2029, the Convertible debentures may be redeemed in whole or in part from time to time at the option of the Trust, at a price equal to their principal amount plus accrued and unpaid interest, provided that the volume weighted average trading price of the units on the TSX for the 20 consecutive trading days ending on the fifth trading day preceding the date on which the notice of the redemption is given is not less than 125% of the conversion price. On and after June 30, 2029, the Convertible debentures may be redeemed in whole or in part from time to time at the option of the Trust, at a price equal to their principal amount plus accrued and unpaid interest regardless of the trading price of the units.

In December 2025, the Trust issued Convertible debentures that bear interest at 6.25% per annum, payable semi-annually in arrears on the last business day of June and December with a maturity date of December 31, 2030.

The Convertible debentures are convertible at the holder's option at any time prior to the close of business on the earlier of the business day immediately preceding the maturity date of December 31, 2030 and the date specified by the Trust for redemption of the Convertible debentures into fully paid and non-assessable units of the Trust, at a conversion price of $27.00 per unit, being a conversion rate of approximately 37.0370 units for each $1,000.00 principal amount of the Convertible debentures.

The Convertible debentures are not redeemable by the Trust before December 31, 2028. On and after December 31, 2028 and prior to December 31, 2029, the Convertible debentures may be redeemed in whole or in part from time to time at the option of the Trust, at a price equal to their principal amount plus accrued and unpaid interest, provided that the volume weighted average trading price of the units on the TSX for the 20 consecutive trading days ending on the fifth trading day preceding the date on which the notice of the redemption is given is not less than 125% of the conversion price. On and after December 31, 2029, the Convertible debentures may be redeemed in whole or in part from time to time at the option of the Trust, at a price equal to their principal amount plus accrued and unpaid interest regardless of the trading price of the units.

Convertible debentures *$ thousands*	**Convertible debenture**	**Conversion component**	**Total**
Balance at January 1, 2026	$ 191,203	$ 7,472	$ 198,675
Accretion	1,967	-	1,967
Change in fair value of conversion component	677	4,922	5,599
Balance at September 30, 2026	**$ 193,847**	**$ 12,394**	**$ 206,241**

8. Management and advisory fees

During the three and nine months ended September 30, 2026 and 2025, the Trust earned revenues from the provision of management and advisory services as follows:

Management and advisory fees	**Three months ended September 30**		**Nine months ended September 30**	
$ thousands	**2026**	**2025**	**2026**	**2025**
Fees earned from Acquisition Entities	$ 5,797	$ 4,908	$ 16,986	$ 14,327
Fees earned from Partner Investments	707	681	2,102	2,068
Total Management and advisory fees	**$ 6,504**	**$ 5,589**	**$ 19,088**	**$ 16,395**

Management and advisory fees are recognized over time as services are provided. Fees earned from the Trust's Acquisition Entities are calculated on a percentage of the capital invested. Fees earned from Partner investments are transaction fees earned from the Trust's management of third-party investments in Sono Bello and Ohana.

9. Fair value of financial instruments

The table below analyzes financial instruments carried at fair value by valuation method. The different levels have been defined as follows:

- Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e. as prices) or indirectly (i.e. derived from prices).
- Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).

The following items shown on the statement of financial position as at September 30, 2026 are measured at fair value on a recurring basis using level 2 and level 3 inputs.

Fair value classification *$ thousands*	Level 1	Level 2	Level 3	Total
30-Sep-26				
Acquisition Entities	$ -	$ -	$ 1,261,220	$ 1,261,220
Loans receivable from Acquisition Entities	-	-	294,422	294,422
Conversion component of convertible debenture	-	12,394	-	12,394
Total at September 30, 2026	**$ -**	**$ 12,394**	**$ 1,555,642**	**$ 1,568,036**

31-Dec-25	Level 1	Level 2	Level 3	Total
Acquisition Entities	$ -	$ -	$ 1,197,895	$ 1,197,895
Loans receivable from Acquisition Entities	-	-	207,872	207,872
Conversion component of convertible debenture	-	7,472	-	7,472
Total at December 31, 2025	**$ -**	**$ 7,472**	**$ 1,405,767**	**$ 1,413,239**

The most significant assumption in the calculation of the fair value of Corporate Investments, which includes the fair value of the Acquisition Entities and the loans receivable from Acquisition Entities, are the assumptions used within the Partner investments held by the Acquisition Entities. Discount rates, terminal value growth rates, cash flow multiples, timing of exit, changes in future distributions from each investment, and estimated future cash flows are the primary inputs in these fair value models and are generally unobservable. Accordingly, these fair value measurements are classified as level 3. There were no transfers between level 2 or level 3 classified assets and liabilities during the three and nine months ended September 30, 2026.

The impact on the fair value of Corporate Investments as at September 30, 2026 from changes in the significant unobservable inputs used to value the underlying assets are as follows:

Level 3 Corporate Investment	Significant unobservable inputs	Impact to fair value (in millions)	
		1% increase to input	*1% decrease to input*
Partner investments	Discount rate	($89.8)	$100.6
Common unit Partner investments	Terminal growth rate	$5.8	($5.1)
Preferred and convertible preferred unit Partner investments	Future distributions	$10.7	($10.4)
Common and convertible preferred unit Partner investments	Future cash flows	$9.5	($9.5)
Common and convertible preferred unit Partner investments	Cash flow multiple	$6.9	($6.9)
		1 year increase to exit timeline	*1 year decrease to exit timeline*
Preferred unit Partner investments	Exit timeline	($18.1)	$24.9

10. Related parties:

During the three months ended September 30, 2026, the Trust derived revenues from the provision of management and advisory services from Acquisition Entities of $5.8 million (2025 – $4.9 million) and $17.0 million during the nine months ended September 30, 2026 (2025 - $14.3 million). At September 30, 2026, the Trust has a net receivable included in accounts receivable and prepayments from Acquisition Entities of nil (December 31, 2025 - $2.1 million).

The Trust has intercompany loans receivable in US dollars from Acquisition Entities. The loans have terms ranging from 3 to 10 years but can be repaid at any time without penalty. There is no impact on net earnings from these intercompany loans. As of September 30, 2026, all outstanding loans bear interest at the rate of 10%. The Trust recognized $6.2 million of interest income during the three months ended September 30, 2026 (2025 – $3.1 million) and $17.6 million during the nine months ended September 30, 2026 (2025 - $9.4 million). The corresponding interest expense incurred by the Acquisition Entities offsets part of the Trust's Net gain / (loss) on Corporate Investments.

During the three months ended September 30, 2026, the Acquisition Entities paid $12.5 million of dividends to the Trust (2025 – $11.5 million) and paid $36.9 million during the nine months ended September 30, 2026 (2025 - $33.1 million). Distributions received from the Acquisition Entities are recorded as income as part of the Trust's Revenue and operating income. For the three and nine months ended, September 2026, the Trust invested net capital of $30.0 million and $23.1 million respectively, of which the Acquisition Entities used to pay down a portion of its senior credit facility. With respect to the prior year, September 2025, during the three months ended the Acquisition Entities returned capital of $1.3 million and in the nine months ended the Trust invested net capital of $72.4 million into AEP, primarily used to repay the senior credit facility.

The Trust guarantees the senior credit facility AEP and Alaris USA jointly hold with a syndicate of Canadian chartered banks, which has a maturity date in September 2029 and is secured by a general security agreement on all of Alaris' assets. During the quarter, Alaris completed an amendment to its senior credit facility, which included increasing the credit limit of available funds from US$450 million to US$500 million, as well as amending the financial covenant funded debt to contracted EBITDA, not to exceed 3.25:1.00 as at each quarter end occurring until December 31, 2026, provided that after December 31, 2026, such financial ratio shall revert back to 3.00:1.00. The interest rate is based on a combination of the Canadian Overnight Repo Rate Average ("CORRA"), Canadian Prime Rate ("Prime"), US Base Rate ("USBR") and Secured Overnight Financing Rate ("SOFR"). At September 30, 2026, total balance drawn on its credit facility was $509.8 million (US$359.3 million) (December 31, 2025 – US$312.8 million). As at September 30, 2026, AEP met all of its covenants as required by the agreement. The covenants which are calculated at Trust's enterprise level include a maximum funded debt to contracted EBITDA of 3.25:1 (actual ratio was 2.38x at September 30, 2026); minimum fixed charge coverage ratio of 1:1 (actual ratio was 1.67x at September 30, 2026); and a minimum tangible net worth of $732 million (actual amount was $1,263 million at September 30, 2026).

The Trust has no contractual commitments to provide any other financial or other support to its unconsolidated subsidiaries. However, the Trust is impacted by financial risks that are incurred by the Acquisition Entities as certain risks may result in a change in the fair value of the net assets of the Acquisition Entities.
